USD  
13.90

### Synopsis:

As a child, Udupi Rao would dream about outer space, where the stars and planets live. When Udupi grew up, he learnt how to build machines called satellites that can be sent into outer space aboard a rocket. With hard work and determination, he succeeded in launching India's first satellite, the Aryabhata! Udupi's story shows that the sky is the limit if you have big dreams and chase them with all your heart.
